Re: *State of Texas v. State of New Mexico and State of Colorado*
United States Supreme Court, Original Jurisdiction No. 141
Selection of Mediator

Dear Judge Melloy:

As requested, the Parties have met and conferred with respect to the selection of a mediator in this matter. We have agreed that the following, in order of preference, would be acceptable to us:

1. Oliver Wanger, U.S. District Court Judge (Ret.)
2. Arthur Boylan, U.S. Magistrate Judge (Ret.)

We have appended a CV of Judge Wanger. We believe you are familiar with Magistrate Judge Arthur Boylan. If necessary, we can meet and confer and produce additional names for your consideration.

We jointly suggest that you contact the above-referenced potential mediators to determine their availability and to yourself evaluate their suitability for the role of mediator.

Additionally, the Parties agree that a technical advisor should be available to assist with the mediation. As you had suggested, we believe that the role and involvement of the technical advisor should, in the first instance, be left to the selected mediator's discretion. We have agreed that the following technical advisors would be acceptable to the Parties:

1. Jeff Fassett
2. Mary Anderson

Judge Michael J. Melloy
Re: *Texas v. New Mexico*: Selection of Mediator
June 11, 2020
Page 2

Mr. Fassett is a former State Engineer for both the State of Wyoming and the State of Nebraska. We have enclosed a 2013 resume for your information. This was before Mr. Fassett was the Nebraska State Engineer. Information on Dr. Anderson can be found at:

<http://www.geology.wisc.edu/~andy/anderson.html>
https://en.wikipedia.org/wiki/Mary_P._Anderson

We also jointly suggest that the mediation process *start* among the Parties only. While we believe that amici will need to be involved in the mediation process, it is our view that the mediator should evaluate and determine the best way to involve amici in the mediation process, including timing for that involvement and the scope of that involvement.

Finally, we have discussed the means to split the costs of the mediator among the Parties. We suggest division of those costs as follows: 30% Texas, 30% New Mexico, 30% United States, 10% Colorado. To the extent that amici are involved in the mediation, we believe that the percentages should be adjusted to reflect costs to be allocated to amici as the Special Master may determine.

The Parties will be prepared to discuss the above recommendations and suggestions further at the June 12, 2020 Status Conference.

Respectfully submitted,

Somach Simmons & Dunn

Montgomery & Andrews

EXPERIENCE

JULY 2006 – PRESENT, DIRECTOR OF WATER RIGHTS STRATEGIC PROGRAM
HDR ENGINEERING, INC

Joined HDR Engineering as their Director of Water Rights Strategic Program involved with water supply, water rights and water resources development projects across the all regions of the country, while continuing his water rights and water resources engineering practice within Wyoming and Colorado for a variety of municipal, government agencies, energy, mining, and private clients.

JUNE 2000 – JULY 2006, PRESIDENT, FASSETT CONSULTING, LLC

Upon leaving the position of Wyoming State Engineer after thirteen years, Mr. Fassett opened his own engineering consulting firm specializing in water rights, water resources engineering, and water policy matters in the western states, based in Cheyenne, Wyoming. Mr. Fassett's activity includes his continued technical and policy assistance to Wyoming's Attorney General toward the completion of the settlement of the Nebraska vs. Wyoming, No. 108, Original U.S.S.C. interstate equitable apportionment litigation. He has been retained to provide expert analysis and testimony on a variety of water resources matters in Arizona in the Gila River General Adjudication proceeding and for the Federal government in the Colorado River matters involving the California 4.4 Plan and reasonable and beneficial use determinations. Mr. Fassett also represents a number of municipalities, energy interests and individuals with their water right and water supply issues.

In September, 2002 Mr. Fassett was appointed by the President to be the Federal Representative and Chairman of the Red River Compact Commission involving the water resources of Oklahoma, Texas, Arkansas and Louisiana.

1987 – JUNE 2000. WYOMING STATE ENGINEER, STATE OF WYOMING

Mr. Fassett was initially appointed by Governor Mike Sullivan and re-appointed by Governor Jim Geringer to the constitutional position as chief water resource official for the State of Wyoming. The State Engineer is the director of all policy, technical, and administrative responsibilities of the cabinet-level agency responsible for the appropriation, beneficial use and general supervision and regulation of all waters in the state. Mr. Fassett duties included state and national legislative activities, budget control, human resources and litigation negotiation efforts. He had continual interaction with federal agencies, including: Bureau of Reclamation, U.S. Geological Survey, Environmental Protection Agency, Bureau of Land Management, U.S. Fish and Wildlife Service, U.S. Forest Service, National Park Service, Army Corps of Engineers, Western Area Power Administration and Soil Conservation Service. Mr. Fassett also had extensive interaction with environmental, water user and conservation interest groups as well as many state, tribal and local government agencies.

Mr. Fassett had extensive involvement with all policy development regarding water resource-related issues including matters addressing wetlands, water marketing and transfer of water, wild and scenic river designations, water development planning, multi-jurisdictional administration of water rights, instream flows and endangered species. Mr. Fassett was the key official in the implementation of Wyoming's instream flow protection law, enacted in 1986. He was Wyoming's representative on many interstate river basin and regional commissions, associations and organizations throughout the west that address water resource policy and law, water quality, and environmental issues in the Colorado, Missouri, Columbia, and Great Basin River basins.

Mr. Fassett has had extensive interaction with regional offices of the U.S. Bureau of Reclamation located in Billings, MT, Boise, ID, Salt Lake City, UT and Boulder City, NV. This unique exposure is the result of joint or cross-jurisdictional water resource management issues involving the U.S. Bureau of Reclamation's jurisdiction and operation of their facilities relating to or affecting Wyoming's water resources. These efforts involved reservoir system re-operation studies to protect multiple public interests on state, tribal and regional bases.

Due to Wyoming's unique geography and the breadth of responsibility of the State Engineer, Mr. Fassett has been involved with a vast array of state, tribal, regional and national water resource and environmental issues, including:

COLORADO RIVER BASIN

- Glen Canyon Dam Environmental Studies and Impact Statement, U.S. Bureau of Reclamation
- Colorado River Salinity Control Forum and Advisory Council — Member
- Upper Colorado River Endangered Fish Species Recovery Plan — Implementation Committee Member

- Congressional Authorization — Central Utah Project, Central Arizona Project, Grand Canyon Protection Act
- Seven-State/Tribal discussions regarding Colorado River issues — Governor's Representative for Wyoming
- Upper Colorado River Commission — Wyoming Commissioner

MISSOURI RIVER BASIN

- Army Corps of Engineers — Master Manual Review
- Missouri River Basin Association (8 states and tribal Representative) — President 1990 - 1991
- Yellowstone River Compact Commission — Wyoming Commissioner
- Big Horn River General Adjudication, reserved water rights — quantification, water right administration, expert testimony, and negotiation efforts
- Buffalo Bill Reservoir enlargement and instream flow agreement
- Madison Aquifer Assessment
- Belle Fourche River Compact — Wyoming Commissioner

NORTH PLATTE RIVER

- Section 7 Reservoir operations review
- Federal Energy Regulatory Commission — Re-licensing at Lake McConaughy
- Nebraska v. Wyoming equitable apportionment litigation and lead representative for settlement negotiations. Settlement pending before U.S. Supreme Court
- Platte River Cooperative Agreement

COLUMBIA RIVER BASIN (SNAKE RIVER)

- Jackson Lake — Palisades Reservoir water exchange and instream flow protection
- Army Corps of Engineers - Section 1135 Wetlands rehabilitation project
- Columbia River system-wide reservoir operations
- Wild and Scenic River designation suitability evaluation
- Snake River Compact — Wyoming Commissioner

GREAT BASIN (BEAR RIVER)

- Cokeville Meadows Wildlife Refuge water rights issues
- Bear River Commission — Wyoming Commissioner

1984 - 1987. DEPUTY STATE ENGINEER, STATE OF WYOMING

Mr. Fassett was the senior manager involved with all work activities of the state water resources agency in assistance to the State Engineer. He was involved in all aspects and phases of technical, administrative and policy efforts associated with the operation of a 120-person agency of state government, including water rights administration, appropriation, regulation, dam safety programs, interstate stream commissioners and state/federal cooperative programs and tribal water resource issues.

1979 - 1984. LEONARD RICE CONSULTING WATER ENGINEERS, INC., DENVER, CO

1983 - 1984. Vice-president and a principal of the firm. Mr. Fassett held management responsibilities for technical and administrative work for the twenty-person engineering firm, including project management, work scheduling, contract negotiations, expert testimony, report preparation and oral presentations to clients, at hearings and public meetings. Mr. Fassett was the principal in charge of technical water resources, water rights and hydrologic projects in Colorado, Wyoming and South Dakota during his tenure as vice-president.

1980 - 1983. Associate. Mr. Fassett had technical responsibility for the water resource/water rights section of the firm, including project management and water rights engineering tasks. He was engaged in surface and ground water investigations, water rights analyses, management, transfers and changes in Colorado Water Court, subdivision and municipal water supply planning studies, river basin and water rights modeling and planning, storage operations and hydrologic studies. He was the project manager of all administrative and technical engineering work relating to the Big Horn River General Adjudication in Wyoming including expert testimony, participation in litigation settlement negotiations, and congressional briefings.

1979 - 1980. Project Manager/Project Engineer. Mr. Fassett's entry to the firm was in a middle-level manager position as a water rights/resource engineer engaged in surface and ground water investigations, water rights management and evaluation, flood hazard delineation, water supply planning, detailed hydrology and hydraulic studies relating to dam designs for the mining industry and urban drainage analyses. He conducted water rights analyses including transfers, changes of use, initial appropriations, yield studies and management for private, municipal and governmental clients.

1975 - 1979. DENVER WATER DEPARTMENT, DENVER, CO

Mr. Fassett held various Water Resource Engineer positions involved with water resource and water rights engineering projects at the Denver Water Department completing assignments in the fields of raw water operations, water resource engineering and planning. He prepared several hydrologic and hydraulic analyses on watersheds upstream of dams and reservoirs. He also conducted and supervised the development of two comprehensive alternative study reports for major water development projects, including economic evaluations and pre-design investigations. He also had technical and administrative responsibility for the Denver Water Department's cooperative reservoir evaporation study.

PROFESSIONAL SPEAKING

Mr. Fassett is an accomplished speaker and is frequently invited to talk on a wide range of subjects to technical, policy and legal associations, regional water resource organizations and at numerous workshops and seminars. Sponsors of forums include:

- American Bar Association
- American Water Resources Association
- Association of State Dam Safety Officials
- Association of Western States Engineers
- Colorado Water Congress
- Four-States Irrigation Council
- National Water Resources Association
- Native American Rights Foundation
- Trout Unlimited
- University of Colorado Natural Resources Law Center
- University of Wyoming Law and Engineering Colleges
- Upper Missouri Water Users Association
- Western Governors Association
- Western States Water Council
- Wyoming Water Association
- Wyoming Wildlife Federation

Mr. Fassett also has spoken to numerous local and regional agricultural, conservation and civic organizations and has been a guest instructor at several colleges. Topics address a wide range of water resource issues, but typically focus on Mr. Fassett's areas of expertise: Wyoming and Western Water Law; Instream Flow Protection; Tribal and Federal Reserved Water Rights — Quantification, Negotiation, Litigation, and Administration; Safety of Dams; Hydrologic Evaluations; and Water Marketing and Transfers.

PROFESSIONAL REGISTRATION AND AWARDS

Wyoming Eminent Engineer — Tau Beta Pi, University of Wyoming, 1999
Distinguished Service Award — Upper Missouri Water Users Association, 1993
Headgate Award — Four-State Irrigation Council, 1991
Engineering Honorary — Tau Beta Pi, Sigma Tau
Registered Professional Engineer (Civil) — in Wyoming (1980) and Colorado (1979)
